Very fun and worth the price. Cute game, nice for children :). Very fun game. Wish there were more people on :/. its veryyyy goooooood. It's a nice little game. Imagine that you are some kind of Robinson Crusoe in the future, and you have to survive by gathering resources and experimenting. The only shortcoming Breached has is that it is very short, it feels like it is a tech demo for a bigger game. So I wouldn't advice buying it for full price, wait when it is on sale. Then you certainly won't regret it.. boring game. terrible movement with keyboard controls.

honestly this game is hilarious and super fun, I have been playing it with my siblings and having a great time, for anyone who enjoys dumb game physics and strategy games i would definitely recommend and if you like war simulations this is so much fun.. Developer is responsive and regularly updates. It's worth my money even though its still in EA. Love the music!. sadly, I cannot seem to install it. until then I'm marking this down.. The best video game of them all!. Normally I don't complain about a game being "unfair" or "challenging", but 50 Years is grueling, even by my standards. The Flash game was addictive, but somehow the Steam version is more difficult. You don't have any way to reliably see when an attack is coming, or what the attack wave contains. The later year scaling is absurd, and only one or two methods of victory are viable. I'd also like to point out that while the game is called 50 Years, every so often, (and I still haven't figured out why or how it happens) there will be a year 51, worse than the final attack wave. I've yet to survive it.

I dunno, it feels weird complaining about difficulty in a video game, because I've legitimately never had a problem with it before, but this game is just not balanced correctly. I have no problem consistently beating the game on normal difficulty or lower, but once I get into the upper difficulties, the game becomes stale with the same meta builds, and seems to actively discourage experimentation. With the price tag, it's not like I wouldn't recommend it to a few die-hard RTS fans, but normal gamers should shy away from 50 Years.. I really love this game! Keep the updates comin'! If you have a VR Headset and you have the money and time, I DEFINETLY RECCOMEND THIS! Its fun! It's really fun!. Battlefield: 2142's servers weren't shut down for this.. Pros :

- + Ridiculous story
- + Unique gameplay
- + Classic pixel art

Cons :

- Can't save game (looks like only happen to me and i had to beat the game in one go)
- Repetitive gameplay

This game is fun, but i wouldn't recommend buy it at normal prices.. This game is recommend for part time because its free and upgrade your skill compose a colour but this game cannt SAVE or countinue. But this game so funny and best a soundtrack
