The C6 Multiband Compressor is a serious tool for enhancing or correcting the sound of your tracks. Its six sliders and two buttons work in tandem to shape your instruments and vocals by adding gain or attenuation in a wide range of frequencies. The C6 Multiband Compressor offers ten wide-ranging bands, each with an independent center frequency, and six sliders to affect these frequencies. In addition, there are two Level knobs, a Bypass switch, and a Compressor Threshold that control all of the

frequency bands. Effects FXs With its six sliders, the C6 Multiband Compressor offers the choice of five FX types, including a compressor, a frequency-dependent resonant filter, a high-pass filter, a low-pass filter, and an octave divider. Fuzz & Lead In addition to its five effect types, the C6 Multiband Compressor offers two frequency-dependent resonant filters: a high-pass filter and a low-pass filter. With the High-Pass Filter and the Low-Pass Filter you can easily create or isolate sound frequencies. EQ The C6 Multiband Compressor offers four EQs: a low-frequency EQ, a high-frequency EQ, a band-pass EQ, and an octave filter. The Low-Pass EQ, the High-Pass EQ, the Band-Pass EQ, and the Octave Filter can be used to increase or decrease frequencies, to balance the frequency spectrum, and to shape the sound of your track. There are five other effects: Expression With the C6 Multiband Compressor's Expression control, you can control the dynamics of your sound. The C6 Multiband Compressor has a Sidechain Input which enables you to connect a selected effect to the audio signal going to the C6 Multiband Compressor. The Sidechain Input has an Input level control and a Bypass control. This enables you to control the sound of your audio going into the C6 Multiband Compressor. If you use a reverb, for example, you can control the sound of the reverb you are using through the sidechain. The C6 Multiband Compressor features a Delay Input which can be used to further modify your sound. By using this delay, you can apply various amounts of time-delayed to your sound to create different effects. The C6
